

CUTE

AUTOMATIC DIALERS

elpra sa
automation

Cute series products are cost effective, micro-controller driven, intelligent DTMF dialers.

They are designed to dial a pre-programmed prefix code upon hook-off.

They are ideal to automatically and transparently select the desired service provider.

CUTE

AUTOMATIC DIALERS

elpra sa
automation

Features:

- *Cute dialers* are micro-controller driven.
- *Cute dialers* are line powered.
- *Cute dialers* are connected in parallel with the telephone line.
- *Cute dialers* automatically detect any off-hook telephone connected to the line, dial the pre-programmed prefix code and then remain in stand-by mode until the end of the current session.
- *Cute dialers* do not alter the quality of the line.
- *Cute dialers* are compatible with analog or isdn type lines.
- *Cute dialers* detect the ringing signal and automatically cancel the dial of the prefix when the line is answered.
- *Cute dialers* are equipped with a push button accessible to the user, to cancel the prefix code dial for the next communication.
- *Cute dialer* flashes a led while dialing the prefix code to optically confirm its action.
- By pressing steadily the button, until the led lights, *Cute dialer* enters the learning mode and adapts to the specific combination of line and telephone, in case of non fully compliant installations.
- *Cute dialers* provide two RJ11 female connectors, internally connected in parallel, to facilitate installation.
